

We are so happy and proud that a private lubricant manufacturing company in Turkmenistan which we started to establish that will start up at January 2023. Even though we are new company, we have completed research and development of products conforming related international standards (API, DIN, GOST etc.) and national standards (TDS) with our latest technology laboratory instruments and experienced staffs. We started to produce 25 types lubricants under the registered brand name ŞIR YAG for serving clients demands. About our factory, we have 80 tons a day and 20000 tons a year production capacity established on a total area of 30000m2 in the Lebap province of Turkmenistan.
